

## Homework: create an imaginary world map

Have a look at a map of our world. Certain physical features like deserts occur in particular places around the world – can you spot which lines they're on?

Draw an imaginary world map that has oceans, seas, mountains, deserts, jungles, polar regions and any other physical features you can think of.

You then need to add lines and labels to show:

- latitude,
- longitude,
- Equator,
- Northern Hemisphere,
- Southern Hemisphere,
- the Tropics of Cancer and Capricorn,
- Arctic and Antarctic Circle,
- time zones (including day and night).
